Attorney Docket No.: 45945-55829-C

U.S. Serial No .: -

Applicant(s): Kang P. Lee

Filing Date: HEREWITH

Group Art Unit: 1723 (presumed) Examiner: A. Ragonese (presumed)

Page 12 of 13

REMARKS

Applicant respectfully requests entry of the following amendments prior to calculating the fee for, and prior to considering the patentability of the above-referenced application, which is being filed concurrently herewith as a continuation of currently pending U.S. Patent Application Serial No. 10/124,433.

As noted above, Applicant has amended the subject application to modify and update its priority claim.

Applicant also has amended claim 41 to correct three inadvertent typographical errors. Specifically, amended claim 41 replaces the semicolon (that followed the word "comprising" at line 2 of claim 41) with a colon, and deletes the word "compressible," that immediately preceded the word "fluid" at line 3 and line 4 of claim 41.

The word "compressible" was not meant to be included within claim 41, as evidenced by the limitations of claim 42, which depends from claim 41 and which recites that the "fluid is compressible." No new matter is added by these amendments to claim 41, support for which is provided throughout this application, including, *inter alia*, at page 8, lines 22-31 of the application as filed.

Applicants respectfully request entry of this amendment, and early consideration and allowance of this application.
